

Healthcare Emergency Coordination Center (HECC)

The Northwest Healthcare Response Network leads the Western Washington Healthcare Coalition, including 15 counties and 25 tribal nations. The Network supports the Public Health District Leads in their Emergency Support Function 8 (ESF-8) role within local Emergency Management, as a key partner in responding to emergencies or disasters that impact the healthcare delivery system. The Network Duty Officer Line is available 24/7 for Healthcare Partners to report incidents that could impact healthcare and, when needed, the Healthcare Emergency Coordination Center (HECC) can be activated to coordinate situational awareness between Healthcare Partners, broker healthcare resource requests, support patient tracking, and share clinical or policy recommendations for decision-making.

24/7 DUTY OFFICER LINE: 425-988-2897

SECONDARY RESPONSE RESOURCES: *(monitored if the Network is activated)*
