

1. Chief complaint	<b>Young boy who walked in with parents, is sitting on the gurney, says to you, "My head hurts," and has an obvious swelling on the left side of his head; has vomited x2 since in ED</b>
History	Healthy; bumped head on wall
Temperature	98.6
Heart rate	85
Respiratory rate	22
Blood pressure	92/56
Height/weight	109/18
Physical exam	Tenderness & edema of left parietal area of head
Diagnosis	Closed head injury <span style="float: right;"><b>YELLOW (tagged GREEN in field)</b></span>

2. Chief complaint	<b>Girl is sitting on gurney talking with her parents and holding her right wrist</b>
History	Healthy; tripped and fell on an outstretched hand
Temperature	98.8
Heart rate	78
Respiratory rate	18
Blood pressure	100/62
Height/weight	139/33
Physical exam	Right wrist: tenderness and edema
Diagnosis	Right distal radius fracture <span style="float: right;"><b>GREEN</b></span>

3. Chief complaint	<b>Toddler is having difficulty breathing – has nasal flaring and audible wheezing</b>
History	Reactive airway disease; developed cough and progressive shortness of breath shortly after the earthquake
Exam	Nasal flaring; bilateral wheezing; using accessory respiratory muscles
Temperature	99.0
Heart rate	120
Respiratory rate	40
Blood pressure	90/50
Height/weight	86/13
Physical exam	Respiratory distress; cough, nasal flaring, bilateral wheezing, using accessory respiratory muscles
Diagnosis	Respiratory insufficiency; possible asthma/ RAD/ inhalation of dust/ allergens; exacerbated by anxiety <span style="float: right;"><b>RED</b></span>

4. Chief complaint	<b>Girl hopped in on one foot with help of father, not bearing weight on left leg</b>
History	Healthy; tripped over debris
Temperature	98.6
Heart rate	78
Respiratory rate	19
Blood pressure	102/64
Height/weight	135/28
Physical exam	Left lower extremity: ankle tenderness, edema, pain with range of motion, refusal to bear weight
Diagnosis	Left ankle sprain <span style="float: right;"><b>GREEN</b></span>

5. Chief complaint	<b>Boy was carried in by his father and cannot bear weight on his right leg</b>
History	Healthy; older brother fell onto patient
Temperature	98.8
Heart rate	82
Respiratory rate	18
Blood pressure	106/64
Height/weight	127/26

Physical exam	Appears to be in pain. Right leg: tenderness, edema, refusal to bear weight
Diagnosis	Right fibula fracture

GREEN

6. Chief complaint	<b>Unresponsive cyanotic infant, staring without focus; mother is crying "Something fell on my baby's head" On inspection, baby is not breathing.</b>	
History	Healthy; object fell off shelf onto patient's head; vomited X3 at home	
Exam	Papilledema; abnormal neurological exam	
Heart rate	10	
Respiratory rate	0	
Height/weight	61/6	
Diagnosis	Head trauma with intracranial injury; hypovolemic shock; expired	<b>BLACK (tagged RED in the field)</b>

7. Chief complaint	<b>Alert toddler has obvious laceration on head and swollen right foot</b>	
History	Healthy; objects fell onto patient	
Temperature	98.1	
Heart rate	95	
Respiratory rate	32	
Blood pressure	95/60	
Height/weight	94/14	
Physical exam	Head: 2 cm scalp laceration with dried blood. Right foot tenderness, edema, ecchymosis	
Diagnosis	Scalp laceration; right foot fracture	<b>GREEN</b>

8. Chief complaint	<b>Young girl, pale, unresponsive, obvious deformity of left upper arm</b>	
History	Healthy; bookcase fell onto patient	
Exam	Pale; not breathing; abdomen with mild distention; left arm deformity, edema	
Heart rate	0	
Respiratory rate	0	
Height/weight	114/20	
Diagnosis	Crush injury; splenic injury; liver injury; left humeral fracture	<b>BLACK (tagged RED) in the field)</b>

9. Chief complaint	<b>Girl is struggling to breathe with circumoral cyanosis; cannot answer any questions</b>	
History	Previous health history unknown; became extremely anxious after earthquake and could not find her inhaler	
Exam	Struggling to breathe; unable to speak; cyanosis around mouth	
Temperature	98.6	
Heart rate	110	
Respiratory rate	35	
Blood pressure	104/58	
Height/weight	119/23	
Diagnosis	Respiratory distress	<b>RED (tagged RED in field)</b>

10. Chief complaint	<b>Pale semiconscious adolescent boy brought on a gurney groaning and holding his left thigh</b>	
History	Healthy; fell	
Temperature	99.1	
Heart rate	120	
Respiratory rate	30	
Blood pressure	90/63	
Height/weight	145/36	
Physical exam	Appears to be in moderate distress. Left leg: tenderness, edema at thigh; refuses to bear weight	

Diagnosis	Left femoral shaft fracture; hypovolemic shock	RED (tagged YELLOW in field)
-----------	--	------------------------------

11. Chief complaint	<b>Adolescent girl who walked in with multiple cuts on hands and legs</b>	
History	Healthy; had to crawl through glass to escape	
Temperature	97.8	
Heart rate	72	
Respiratory rate	18	
Blood pressure	94/60	
Height/weight	140/33	
Diagnosis	Multiple superficial to deep cuts on palms, knees, shins, feet; no active bleeding	<b>GREEN</b>

12. Chief complaint	<b>Agitated preschool boy brought to ED by paramedics who found him wandering the streets alone 4 hours after the earthquake</b>	
History	Healthy; paramedics found patient 4 hours after earthquake	
Exam	Child appears afraid and confused; becomes agitated when asked about family; cannot recall recent events; increased startle response	
Temperature	97.6	
Heart rate	96	
Respiratory rate	20	
Blood pressure	104/64	
Height/weight	109/15	
Diagnosis	Acute stress disorder	<b>RED (tagged RED in field)</b>

13. Chief complaint	<b>Young boy with left orbital ecchymosis, nose bleed and bleeding gums, upper teeth displaced backward</b>	
History	Healthy; trophies fell on patient	
Exam	Left orbital ecchymosis; maxillary tenderness; epistaxis; lingually displaced upper incisors	
Temperature	98.6	
Heart rate	90	
Respiratory rate	20	
Blood pressure	100/70	
Height/weight	133/28	
Diagnosis	Left zygomatic arch and maxilla fractures	<b>YELLOW</b>

14. Chief complaint	<b>Young semiconscious girl brought in by ambulance, pale</b>	
History	Healthy; large television fell on patient	
Exam	Declining mental status; unstable pelvis; right thigh and buttock ecchymoses	
Lab	Hematuria	
Temperature	100.8	
Heart rate	152	
Respiratory rate	21	
Blood pressure	50/36	
Height/weight	94/14	
Diagnosis	Hypovolemic shock; crush syndrome; pelvic fracture; right femur fracture	<b>RED</b>

15. Chief complaint	<b>Limp infant with dry mouth, sunken eyes, blank stare, tachypnea</b>
History	Healthy; mother had no water to make formula for the infant
Exam	Sunken anterior fontanelle; oliguria; dry mucous membranes; no tears
Temperature	99.2
Heart rate	158
Respiratory rate	42
Blood pressure	95/50
Height/weight	65/7
Diagnosis	Dehydration <span style="float: right;">RED</span>

16. Chief complaint	<b>Young boy crying with severe pain in lower left leg which is swollen, red, hot</b>
History	Healthy; patient fell and left leg became wedged between furniture
Exam	Left lower leg edema, erythema, pain out of proportion, increase temperature
Temperature	99
Heart rate	94
Respiratory rate	22
Blood pressure	120/78
Height/weight	122/23
Diagnosis	Compartment syndrome of left leg; left tib/fib fracture; right scaphoid fracture <span style="float: right;">YELLOW</span>

17. Chief complaint	<b>Adolescent boy with short halting breaths and obvious respiratory distress, holding left side</b>
History	Healthy; object fell on patient
Exam	Left chest tenderness with decreased breath sounds; LUQ abdominal tenderness
Temperature	100.6
Heart rate	96
Respiratory rate	32
Blood pressure	118/72
Height/weight	144/36
Diagnosis	Left pneumothorax; spleen injury; rib fractures <span style="float: right;">RED (tagged RED in field)</span>

18. Chief complaint	<b>Preteen girl female brought in by ambulance, unable to move right leg</b>
History	Healthy; patient was riding bicycle and crashed into a tree when earthquake hit. She was wearing a helmet.
Exam	Right clavicle deformity, edema and tenderness; R lower extremity externally rotated and foreshortened; with R hip with tenderness, edema, ecchymosis
Temperature	99.9
Heart rate	90
Respiratory rate	19
Blood pressure	109/69
Height/weight	138/33
Diagnosis	Right clavicle fracture; right hip fracture <span style="float: right;">YELLOW</span>

19. Chief complaint	<b>Healthy appearing active and talkative toddler girl</b>
History	Healthy; Mom carrying child and fell during earthquake.
Temperature	98.6
Heart rate	88
Respiratory rate	24
Blood pressure	93/55
Height/weight	85/12
Diagnosis	Normal physical exam; no signs of trauma <span style="float: right;">GREEN</span>

20. Chief complaint	<b>Young girl who is sitting on gurney with drooping left shoulder; is hysterically crying in pain</b>
History	Well-controlled asthma; fell while climbing tree house ladder
Exam	Left humeral head displaced anteriorly and inferiorly
Temperature	98.7
Heart rate	84
Respiratory rate	21
Blood pressure	106/70
Height/weight	133/29
Diagnosis	Left glenohumeral dislocation
	<b>YELLOW</b>

21. Chief complaint	<b>Young boy, who is sitting on his mother's lap, is holding his hand over right eye</b>
History	Healthy; foreign body in eye, possibly glass
Temperature	98.5
Heart rate	102
Respiratory rate	29
Blood pressure	96/65
Height/weight	115/21
Physical exam	Left conjunctival injection, blurry vision in left eye, photophobia, tearing, foreign body sensation
Diagnosis	Foreign body in cornea
	<b>GREEN</b>

22. Chief complaint	<b>Young boy sitting on gurney with cuts on his face and arms</b>
History	Healthy; window shattered near patient
Temperature	98.4
Heart rate	86
Respiratory rate	25
Blood pressure	100/60
Height/weight	122/23
Diagnosis	Multiple deep and superficial lacerations, some requiring foreign body removal and sutures
	<b>GREEN</b>

23. Chief complaint	<b>Young boy sitting on gurney holding his left arm and talking to his father</b>
History	Healthy; object fell on patient
Temperature	98.5
Heart rate	81
Respiratory rate	19
Blood pressure	96/62
Height/weight	128/26
Physical exam	Left arm edema and tenderness
Diagnosis	Left radius and ulna fracture
	<b>GREEN</b>

24. Chief complaint	<b>Preschool girl standing by the gurney and talking to her grandmother</b>
History	Healthy; object fell on patient
Exam	Right upper quadrant tenderness; Right CVA tenderness
Lab	Occult hematuria

Temperature	99.3	
Heart rate	108	
Respiratory rate	28	
Blood pressure	80/51	
Height/weight	101/16	
Diagnosis	Right renal contusion	<b>GREEN</b>

25. Chief complaint	<b>Preschool girl brought in by ambulance complaining of back pain</b>	
History	Healthy; object fell on patient	
Exam	Tenderness over lower lumbar spine; decreased sensation, motor response at knees and distally bilaterally	
Temperature	98.5	
Heart rate	106	
Respiratory rate	27	
Blood pressure	101/63	
Height/weight	108/18	
Diagnosis	Displaced L4 vertebral fracture; spinal cord injury	<b>YELLOW (tagged RED in field)</b>

26. Chief complaint	<b>Adolescent boy with difficulty breathing, face contorted in pain</b>	
History	Healthy; fell off top bunk bed into lower bed and debris	
Exam	In respiratory distress and extreme pain; flail right chest with markedly decreased breath sounds, tenderness, ecchymosis and subcutaneous emphysema; right forearm tenderness; tenderness and edema right thigh	
Temperature	100.9	
Heart rate	92	
Respiratory rate	24	
Blood pressure	110/72	
Height/weight	175/40	
Diagnosis	Right pneumothorax; right rib fractures 4-7; midshaft fracture of right ulna; right femoral shaft fracture	<b>RED</b>

27. Chief complaint	<b>Teenage boy with compound fracture of left lower leg; says "Hey Doc...can you fix this?"</b>	
History	Healthy; fell down stairs landing on debris	
Temperature	100.1	
Heart rate	124	
Respiratory rate	18	
Blood pressure	118/70	
Height/weight	173/61	
Diagnosis	Open tibia and fibula fracture	<b>YELLOW (tagged RED in field)</b>

28. Chief complaint	<b>Teenage boy brought in by parents after fall with LOC, cannot tell you how old he is</b>	
History	Healthy; fell and hit head and admits to brief LOC	
Exam	Declining mental status; left temporal contusion/ hematoma; dilated left pupil	
Temperature	100.4	
Heart rate	57	
Respiratory rate	14	
Blood pressure	100/58	
Height/weight	155/45	
Diagnosis	Epidural hematoma; left temporal bone fracture	<b>RED</b>

29. Chief complaint	<b>Teenage boy with second and third degree burns from gas explosion</b>	
---------------------	--	--

History	Healthy; gas explosion/fire at patient's home	
Heart rate	0	
Respiratory rate	0	
Height/weight	170/57	
Physical exam	Obvious burns; unconscious; unresponsive; not breathing	
Diagnosis	Second and third degree burns to 30% body surface	<b>BLACK (tagged RED in the field)</b>

30. Chief complaint	<b>Adolescent girl who smells of smoke has breathing problems and black soot in nares</b>	
History	Healthy; gas explosion/fire at patient's home	
Temperature	100.9	
Heart rate	97	
Respiratory rate	35	
Blood pressure	104/72	
Height/weight	151/42	
Physical exam	Disorientation, cough, wheezing, singed nasal hair	
Diagnosis	Smoke inhalation	<b>RED (tagged RED in field)</b>
