

FEMA REGION X TRAINING OPPORTUNITY

FEMA

Course: L0050

Exercise Control and Simulation

Date:

September 22-23, 2021

Location:

Camp Murray, Washington

Course Description:

Hosted by the Washington Emergency Management Division (EMD) and FEMA Region X, this 2-day course is designed to introduce you to the fundamentals of Exercise Control and Simulation. Completion of this course will help prepare you to design and conduct exercises consistent with the Homeland Security Exercise and Evaluation Program (HSEEP) doctrine. The use of HSEEP, in line with the National Preparedness Goal and the National Preparedness System, supports efforts across the whole community that improve our national capacity to build, sustain, and deliver Core Capabilities.

Exercise control maintains exercise scope, pace, and integrity during conduct under safe/secure conditions. Key elements of exercise control include controller staffing, structure, training, communications, and safety and security. Exercise simulation uses the Master Scenario Events List (MSEL) and related instruments to enhance the exercise experience.

This course is designed to demonstrate and provide you the opportunity to develop exercise control and simulation tools in a no-fault/low stress environment while working with your peers.

Funding:

Tuition is free for those accepted; there are no travel/salary stipends available for this offering and all incurred costs are the responsibility of the attendee or sending organization.

Prerequisites:

Required prerequisites include 1-3 years experience designing and conducting emergency management exercises consistent with the HSEEP doctrine and Independent Study (IS) [IS-120.c](#) and L/K0146 Homeland Security Exercise and Evaluation Program (HSEEP).

Target Audience:

Candidate selection will be based on participation in National Level Exercise (NLE) 2022 Cascadia Rising.
